

# GPIO

raspi\_-\_get\_gpio\_demo.bash

```
#!/bin/bash

# ...
ports="/sys/class/gpio/gpio21/value /sys/class/gpio/gpio21/value"

# Schleife
while [ true ] ; do
    for port in ${ports} ; do
        v=$(< ${port})
        #echo "Debug: ${port} = ${v}"
        if [ ${v} = 1 ]; then
            echo "Pin an"
        else
            echo "Pin aus"
        fi
    done
    sleep 1s
done
```
